

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

My phone bill for FCC charges already exceed the charges I had for my entire phone bill when I was first able to afford a telephone at all.

I am unable to determine the benefits being provided Americans with this revenue.

I am also not convinced that this is a cost effective way to redistribute the wealth of the working class. We have already been taxed on the money you are taking. If the Federal Government needs more income for it's people let it be by Income Tax not hidden away in a phone bill!

Keep the USF Fair!

Sincerely,

CJ Havens
